

Redefining Luxury For The Home & Theater

HTR-2400 Home & Theater Receiver

The HTR-2400 is a sophisticated multi-room system and a 7.1 digital home theater receiver, all housed in the same chassis. As many as eight source components can be accessed simultaneously throughout the home including the built in AM/FM/WX (weather band) radio and XM Radio tuners. The theater can access these devices as well as another five digital sources. While rooms throughout the home can view any video source, the theater can also switch HDTV signals.

The HTR-2400 is easy to control and operate. Three knobs permit you to select a room, dial in a source, and adjust room volume levels. The fourth knob is used to select surround modes in the theater. A widescreen color LCD video display is used to preview a movie, navigate a DVD or satellite receiver menu, and view system status including XM Radio® information.

ADA provides a full line of easy to use keypads that integrate seamlessly with the HTR-2400.

The HTR-2400...an easy decision.

An Easy Decision

Sometimes you are torn when making tough choices. Should you opt for a home theater system or would your lifestyle be better served by installing a distributed whole-house audio system?

Introducing ADA's HTR-2400 Home & Theater A/V Receiver, a single component that combines all of the features of a digital home theater receiver with the functionality of an eight source, eight zone multi-room A/V system. When it comes to luxury, why settle?

The Brand of Excellence

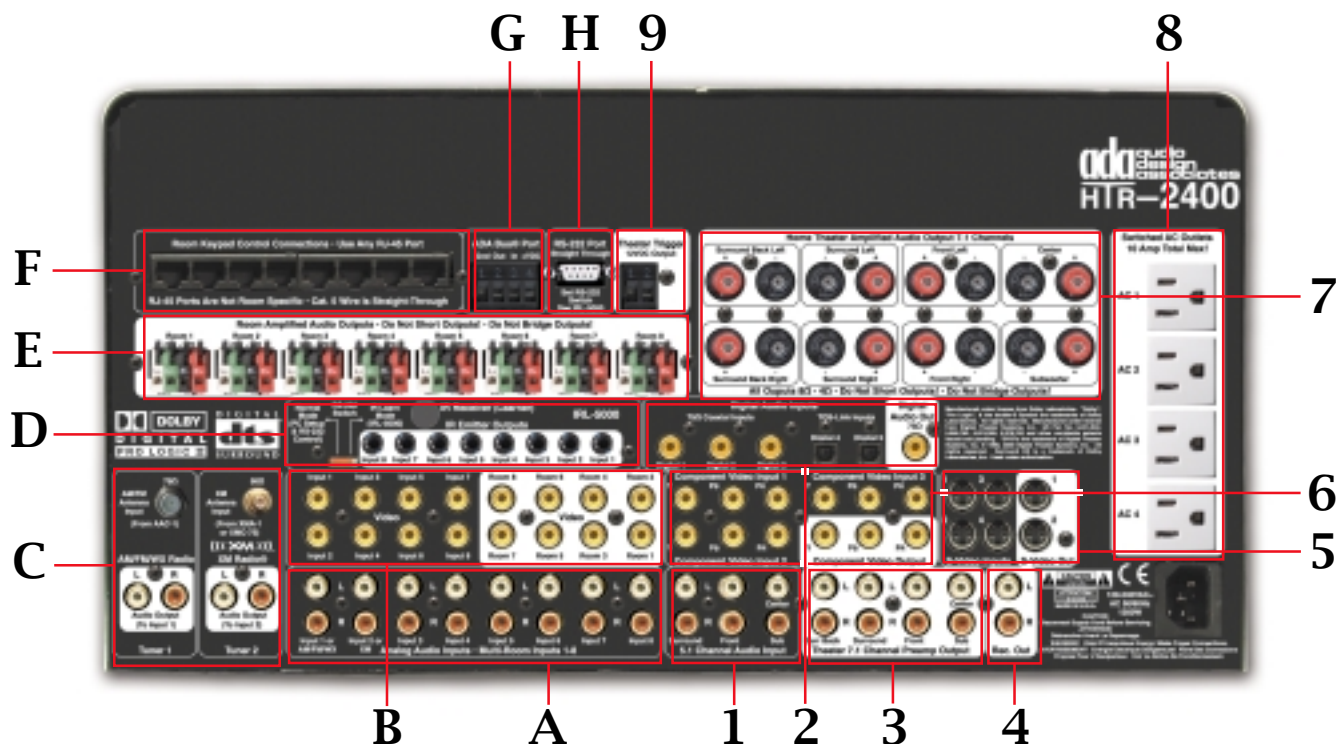

Audio Design Associates, the undisputed founder of custom installation electronics, is recognized as the industry leader when it comes to performance and quality. With over a quarter-century under our belt, ADA again redefines custom installed luxury.

For the Home

- A 8 Stereo Audio Inputs (Home & Theater)
- B 8 Composite Video Inputs (Home & Theater) and Video Outputs for Each Room
- C AM/FM/WX and XM Radio® Tuner
- D 8 IR Outputs & Internal IR Learner
- E 8 Rooms of Amplification (100W/Ch)
- F RJ-45 Cat. 5 Keypad Termination Jacks
- G ADA Bus® Data Port for ADA Add-Ons
- H RS-232 Data Port for System Integration

Whether the term is multi-room, distributed, or whole-house audio, the meaning is the same....music throughout your home that is as easy to access as turning on the lights. Multi-room audio should also sound great, not just "good enough." The HTR-2400 hits all of the high notes by combining great sounding preamplification with massive power amplification (rated at 200 Watts of power per zone). The HTR-2400 also features two built in radio tuners, one for standard FM, AM and Weather Band (WX) and a second one for digital XM Satellite Radio® which can be played simultaneously.

For the Theater

For home theater, the HTR-2400 incorporates a state-of-the-art digital surround sound decoder. DVDs and HDTV broadcasts are typically played in either Dolby Digital Surround EX or DTS 5.1. Older films and regular TV can be heard in Pro Logic II. You can even listen to your favorite music in surround sound. We have built the home theater receiver section with the same high-power amplifier used in the multi-room audio section to provide 100 Watts for each theater speaker.

- 1 5.1 DVD Audio/SACD Audio Input
- 2 5 Digital Audio Inputs (3 Coax, 2 TOS-Link)
- 3 8 Channel 7.1 Audio Output
- 4 2 Channel Analog Audio Record Output
- 5 4 S-Video Inputs & 2 S-Video Outputs
- 6 3 Component Video Inputs & 1 Output
- 7 7.1 Channels of Amplification (100W/Ch)
- 8 4 Switched AC Outlets for Sources
- 9 Low Voltage Trigger for Home Theater
